

WHEN TO FUEL YOUR CAR

By Torben Mülitze

Introduction

Maybe you have had the feeling one day while you were fueling your car that the prices on a specific day seem to be cheaper.

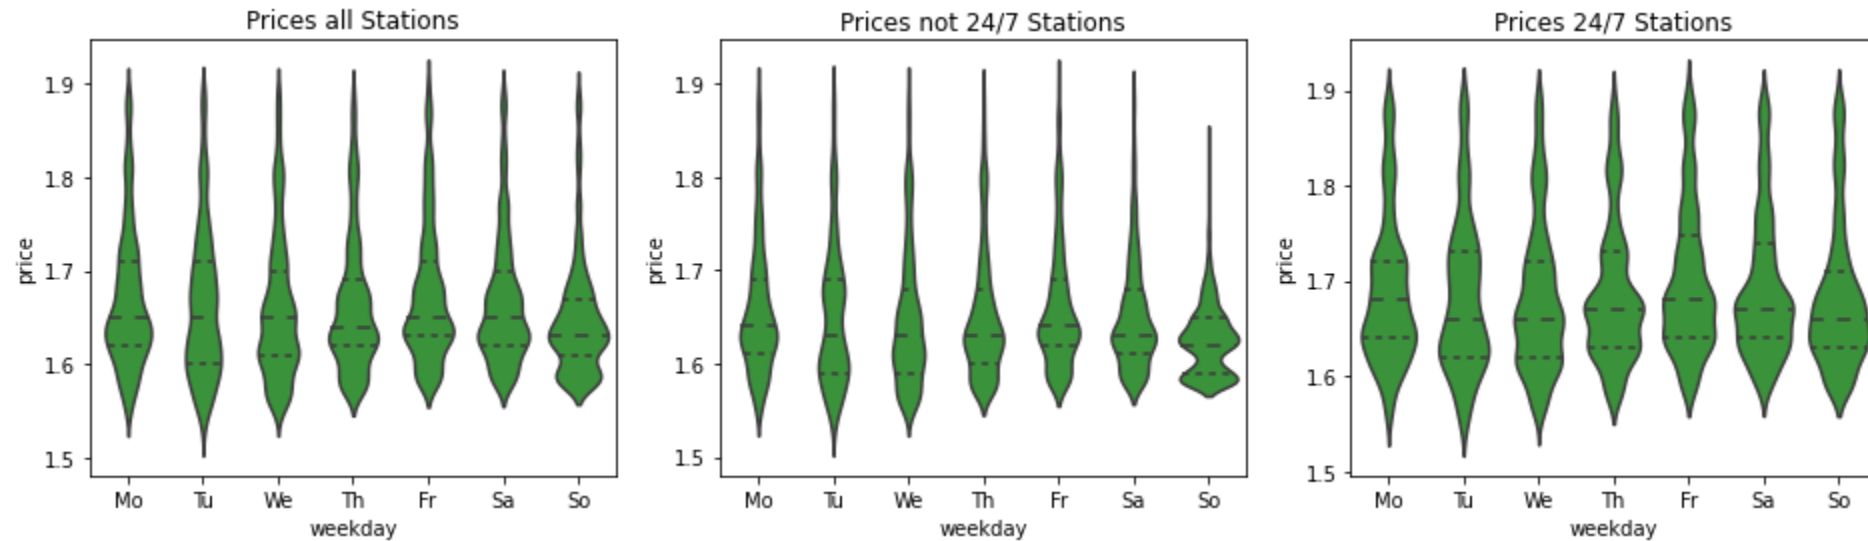

Also when having to fuel your car in the morning it almost always seems to be much pricier.

But is there really a time where fuel prices tend to be lower?

Let's find out!

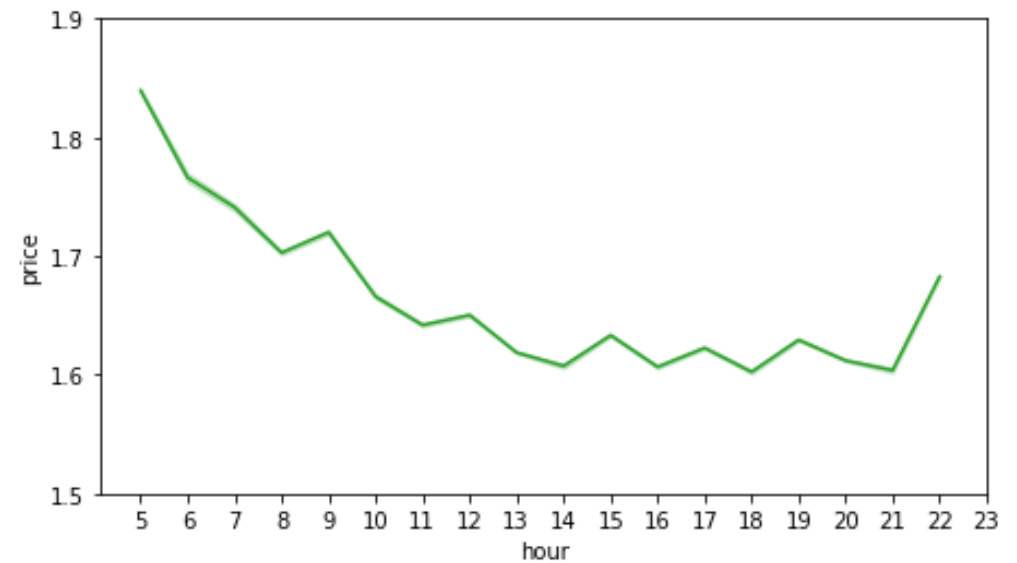

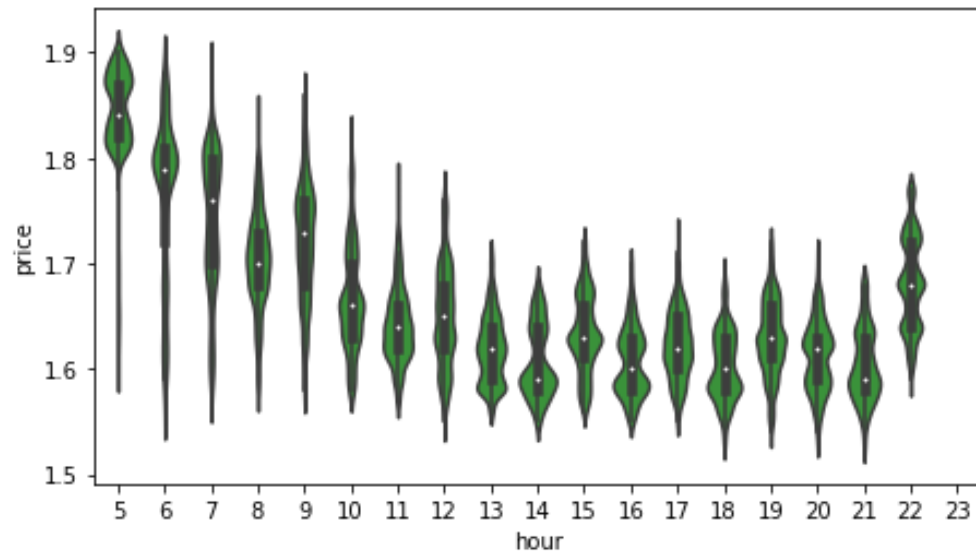

Fuel Prices across the week

- Looking at the price distribution during the week we see that the price on Thursday to Saturday seem to be lower.

Fuel Prices across the day

- In the evening the prices seem to get lower.

Take away

- So we found that during the time the data was gathered it was cheaper to fuel your car on Thursday to Saturday between 13 and 20 a clock.
- Since the data was gathered over a short time it's currently uncertain if this only was a trend. Only time can show.

Extra

- In addition we checked the average difference between min and max values during a weekday.
- Prices vary on average around 25 cents during the day.
